ABOUT US

African Engineering and Construction Solutions is a professional consulting engineering company that specialises in civil, mechanical, and electrical engineering services. With our central location in the towns of Bethlehem and Bloemfontein, we are well-positioned to serve clients across Southern Africa. Our team of skilled engineers have a deep understanding of their area of expertise, which enables us to provide optimum solutions to both private and public sector clients. Whether it is a small private project or a large public infrastructure project, African Engineering and Construction Solutions has the expertise and experience to deliver high-quality results that meet and exceed the client's expectations

EXPERTISE

African Engineering and Construction Solutions has extensive experience related to civil, mechanical, and electrical infrastructure, including:

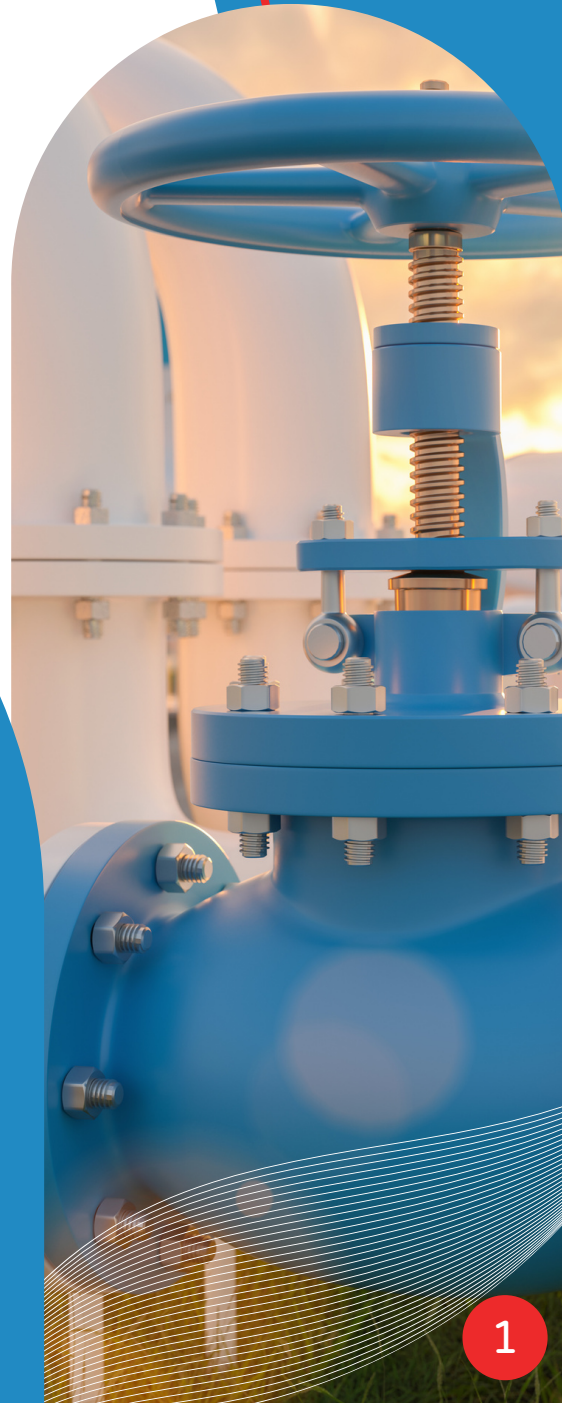

- Bulk water supply systems, including pipelines, pump stations, and water treatment works
- Bulk sanitation systems, including pipelines, pump stations, and wastewater treatment works
- Water and sewer reticulation systems
- Master planning, including water, sanitation, roads and stormwater, etc.
- Roads and stormwater
- Municipal infrastructure
- Refurbishment of infrastructure
- Project & Contract management

SERVICES

African Engineering and Construction Solutions has vibrant, informed and experienced technical staff.

Our engineering services include:

- Consultation and project conceptualisation
- Feasibility studies
- Business plans and funding applications
- Design
- Tender documentation and contracts
- Refurbishment of existing infrastructure
- Construction monitoring
- Operation and maintenance management
- Infrastructure master planning
- Contract management
- Project management
- Construction management and administration
